

Latest Prompt for SafeNet Shield DNS Server+ via Replit

Take a Clone from my Replit provided Domain URL (<https://safe-net-shield-official.replit.app/>), and

Ensure the new App/APK/PWA Build is 100% Safe, 100% Live, 100% Autoscaled for Android Devices including Phones, Tablets, and TV, 100% Real, 100% Accurate, 100% Visible, and 100% Working with Auto-Upgrades to GitHub, and Replit Domain URL

(<https://safe-net-shield-official.replit.app/>) for the Pages, Tabs, and Features in App/APK/PWA including:

1. Add a ISP-Based Measure Your Network Speed Test Infographic as seen on Replit Domain URL (<https://safe-net-shield-official.replit.app/>).
2. Ensure Edit Pencil Tools are present or Add to all applicable pages/tabs/features.
3. Ensure the DNS Configuration>DNS Entry works with correct details.
4. Ensure the Toggle buttons are visible and not too large.
5. Ensure the Add/Delete buttons work correctly.
6. Ensure Ai Shield from Firewall Rules page is removed.
7. Ensure an actual 100% working Ai Screen/Camera Scanner for Nudity is built. (Refer to BullDog Blocker, and SafeSurfer on Google Play).
8. Ensure the Firewall Rules options are working correctly. Remove the "Allow Google/Gmail" button.
9. Ensure the app has an actual built-in robust antivirus with real-time apk/web scanner.
10. Safely Autoscale the entire app and elements for Android devices.
11. Ensure the SafeNet Inc. logo as seen on the top right corner of the Settings page is always present in the App/APK/PWA.
12. Ensure APK Endpoint protection is working automatically. Scan Browser, File Transfer, and Google Play Store downloads each time.
13. Ensure Notifications Act/React with the right information accordingly when triggered by toggles or events.
14. Ensure there are Zero Errors in functionality throughout the app.
15. Ensure User Input is acquired correctly, and the user is notified with instructions if errors exist.
16. Ensure my HAPP defeats Private VPN Proxy Browsers like UPX Browser.
17. Ensure the Android Status Bar is fully-visible when scrolling within the App/APK/PWA.
18. On the DDNS Tab, Write Dynamic DNS as the Header/Title name. Keep DDNS for the Tab Icon.
19. On-Startup, Show an actual Connecting to SafeNet Shield DNS Server+ Loader with a Live Red Triangular Tri-Dots in the middle of this background image (<https://drive.google.com/file/d/1FCRkhlTptVUftTEJAgLKEz5INI0adSRa/view?usp=sharing>). Autoscaled.
20. Ensure you have safely Autoscaled everything for Android Devices including Phones, Tablets, and TV.
21. After the Start-Up screen. Add Standard Sign-In, and Sign-Up Options for major E-mail services with minimal permissions access.
22. Add \$5 Monthly Subscription Payment option with the right integrations or services such as Google/Google Play Store.
23. Add "Contact Us: Post@SafeNetInc.Ca" at the very bottom of the Settings page.
24. Ensure App Access Protection feature is 100% working, and safe to use.
25. Ensure Security Modules, Device Integration, DNS Protection VPN, Ai Shield on System Settings is 100% working, and safe to use.
26. Ensure my Dashboard is showing accurate information including Network Traffic Analysis.
27. Ensure the APK app is mistake-proof and cannot overblock or brick my phone at any point even when using Screen and Camera Detection.
28. Ensure Access Logs are reflecting accurately.
29. At the very bottom of the Settings page, Show a "Made in Canada with Replit" Text, and Replit's Logo including Canadian Flag with a Wave.
30. Replace and Write SafeNet Shield DNS Server+ (Official) v1.0.20 as the Hardcoded App/APK Name at the very bottom of the Settings page.
31. Make my App/APK VPN compatible with Android's Built-In Private DNS with Only AdGuard DNS, Next DNS, and Control D inputs.
32. Ensure the Touchscreen/Keyboard Act/React perfectly throughout the App/APK with the best applicable SFX/VFX.
33. Add an Instrumental Space Soundtrack playing in the background throughout the App/APK/PWA.
34. As a Final Step, Publish and Release the Latest App/APK/PWA on GitHub, my [Replit Domain URL](#), and Browser-Based Installations.
